Aim:- Write a program which demonstrates Hooks(UseEffect), refs in React JS

Program code:-

```
import { useState, useEffect, useRef } from "react";
import ReactDOM from "react-dom/client";
function App() {
 const [inputValue, setInputValue] = useState("");
 const count = useRef(0);

 useEffect(() => {
  count.current = count.current + 1;
 });
 return (
  <>
   <input
    type="text"
    value={inputValue}
    onChange={(e) => setInputValue(e.target.value)}
   />
   <h1>Render Count: {count.current}</h1>
  </>
 );
}
export default App;
const root = ReactDOM.createRoot(document.getElementById('root'));
root.render(<App />);
```

Output:-

Render Count: 19

Conclusion:- Successfully Implemented use Hook effect with ref in a program
